Statement from Mayor Carty Finkbeiner
Regarding Dismissal of Dr. Patsy Scott as
Director of Information and Communication Technology

Patsy Scott, Director of Information and Communication Technology was relieved of her duties this afternoon. The people who work for the city can not function independently of the team. Unfortunately, Ms. Scott did so.

I was particularly dissatisfied with the level of communication between Ms. Scott, the community, and the city leadership regarding the City of Toledo WiFi project. This very important project has not had the quality of leadership, communication, and networking with the community it deserves. A director must accept responsibility for leading the very important projects of his or her department, without making excuses.

The City of Toledo WiFi project will move forward under the direction of Todd Davies, Commissioner of Development. Valerie Robertson, Commissioner of Information and Communication Technology, will be responsible for leadership of the department on an interim basis.
